Dr. DeLoach is a highly experienced Board Certified Orthopedic Surgeon. He treats a wide variety of orthopedic problems. He has many years of experience in all types of bone and joint injuries and handles many different trauma cases. His philosophy for his patients is to discuss and educate them about their diagnosis and the appropriate course of treatment. During surgery, Dr. DeLoach uses the newest technology to maximize the patient's rehabilitation potential. Smaller incisions are made at the surgery site to minimize scarring. Step by step aggressive rehabilitation is utilized to obtain a faster return to normal activities.
